Professional Summary

Junior Full-Stack Developer with hands-on experience in Java, Spring Boot, REST APIs, and React, having built and deployed production-ready applications with role-based access control, JWT authentication, and CI/CD pipelines. I bring 12 years of client interaction and back-office experience, working directly with clients and operations teams to support a company branch with 3,450+ active gym members. For a deeper look at my transferable skills behind this work area transition, feel free to check **my website softskills section**.

Projects / Tech Skills

Work Timetable Manager

06/2026

Java 17 · Spring Boot · React · Google OAuth2 · Google Calendar API · Apache POI · PostgreSQL · Railway · Versel

- **Full-Stack SPA Dashboard** — Web application where fitness instructors log in via Google OAuth2, upload their Excel timetable, and manage their weekly schedule through a clean dashboard interface.
- **Excel Parsing** — Spring Boot backend reads uploaded .xlsx files using Apache POI, identifying the instructor by input initials, and maps its chores to the calendar.
- **Google Calendar API Integration** — Exports each instructor's sessions directly to their personal Google Calendar, eliminating manual entry and reducing scheduling errors across the team.

Sticker Marker (personal project)

05/2026

Java 17 · Spring Boot · Spring Security · JWT · React 19 · Railway · GitHub Actions · Postman · PostgreSQL (NEON) · Claude AI

- **Full-Stack + JWT Auth** — Spring Boot REST API with 10+ secured endpoints, implementing access/refresh token authentication and role-based session handling.
- **CI/CD - Cloud Deploy** — Automated pipeline: Docker backend to Railway + frontend GitHub Actions to GitHub Pages, on every push.
- **AI Agent Assisted Development** — Built my first small Claude agent for architecture corrections and tests

Team Safety Monitor (final bootcamp project)

03/2026

Java · JavaScript · CSS3 · Spring Boot · Spring MVC/Data · PostgreSQL · Maven · Apache Tomcat · REST APIs · Web Components · Fetch API

- **REST API · Role-Based Access** — Spring Boot REST API following the MVC pattern, with PostgreSQL persistence and dedicated Admin/Member dashboards with automated threshold alerts.
- **Vanilla JS** — custom frontend with client-side and admin-side routing and reusable Web Components.

Presentation Website (personal project)

04/2026

React · GitHub Pages

- **React** — Personal presentation website with a clean UI, responsive layout, and smooth navigation. Deployed via GitHub Pages with an optimized build workflow.

Professional Experience

Fitness Instructor & Project Sub-Coordinator (Client Interaction & Lifetime)

2014 - 2026

- Monitored attendance, member behavior and preferences, and operational KPIs across 3,400+ active members, driving a **34% increase in class attendance** and **1.5 points** (on a 0-10 scale) in client satisfaction reports.
- Coordinated communication between clients and staff to ensure consistent service delivery for physical evaluation services, identifying and resolving issues that directly **improved company KPIs** — increasing completion rates while reducing unfinished, cancelled, and unwanted appointments.
- **Developed a full-stack web application** that automates a complex and error-prone timetable system saving time and schedule errors for all fitness instructors across our company gyms.
- **Deliver group training classes up to 45 participants** with energy and clarity while fostering a positive, inclusive, and high-performance environment.
- **Managed a portfolio of 8–15 personal training clients simultaneously**, designing and implementing structured programs tailored to individual fitness levels, goals, and client profiles, ensuring consistent progression and measurable results.
- Maintained high service standards across all client interactions, directly contributing to member satisfaction, well-being, and overall gym reputation.
- **Collaborated with colleagues** to coordinate schedules changes and sustain a healthy, productive, and team-oriented workplace culture.

Education

Full-Stack Java Bootcamp

06/2025 – 06/2026

Codeforall — Porto, Portugal

- **Full-Stack Training** — Intensive programmed covering Java 17, Spring Boot, REST APIs, MVC architecture, JPA/Hibernate, JUnit, Mockito, React 19, PostgreSQL, and Git/GitHub.

- **Independent Development** — Following the bootcamp, independently built and deployed production-ready applications including a CI/CD pipeline, JWT authentication system, and a Google Calendar API integration, all publicly available on GitHub.
